

Environmental Policy

Semefab is one of the leading suppliers to the electronics sector and aims to be at the forefront of product development and delivery. The company aims to deliver its products whilst also protecting the environment.

Semefab will ensure that its environmental management system (EMS) meets the requirements of BS EN ISO 14001:2004.

We are currently in the process of transitioning to the new ISO 14001:2015 standard which we expect to have accreditation for in early 2018.

To do this we recognise what actual and potential impacts our activities may have on the environment and shall implement all reasonable measures to ensure any negative impacts are minimised.

The following points describe our key environmental policy requirements:

- Semefab shall ensure there are adequate resources in place to deliver good environmental management and to fulfil all our compliance obligations
- The company is committed to protecting the environment and the prevention of pollution
- We shall set clear and documented environmental objectives that reflect our key environmental issues; these shall be communicated to relevant interested parties and we shall implement activities to ensure we to meet these objectives
- The company is committed to continual improvement of the environmental management system and our environmental performance
- We shall ensure staff are suitably informed and trained on their role in meeting the requirements of this policy

This policy shall be made available to all staff and other interested parties on request.
